# VERMØNT NATURAL COATINGS® Revised Date: 05-01-2017

# **SAFETY DATA SHEET**

**BÖHME AGING STAIN** 

Supersedes: 03-07-2015

Product identifier	Aging Stain – all colors
Product type	Liquid
Other means of identification	
Synonyms	None
Product Code	-
Recommended use	No information available.
Recommended restrictions	No information available.
Manufacturer/Importer/Supplier/D	istributor information
Manufacturer/Supplier	Vermont Natural Coatings

### 3. Composition/information on ingredients

#### Mixture

Chemical name	CAS number	<u>%</u>

### N/A

4. First-aid measures	
Inhalation	Remove to fresh air. Administer oxygen if necessary. Seek immediate medical attention.
Skin contact	Wash thoroughly with soap and water. If irritation persists, get medical attention.
Eye contact	Flush with large quantities of water for at least 15 minutes. Remove contact lenses if present. Seek immediate medical attention.
Ingestion	Do not induce vomiting. Drink 1 or 2 glasses of water to dilute. Obtain medical attention immediately.
Most important symptoms/effects, acute and delayed	No known significant effects or critical hazards.
Indication of immediate medical	Provide general supportive measures and treat
attention and special treatment needed	symptomatically. Keep victim under observation. Symptoms may be delayed. In case of shortness of breath, give oxygen. Keep victim warm.
General information	If exposed or concerned: get medical attention/advice. Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Wash contaminated clothing before re-use.

### 5. Fire-fighting measures

Suitable extinguishing media	Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	Strong water jet.
Specific hazards arising from the chemical	Closed containers may explode when exposed to extreme heat or fire. Decomposition of burning material may cause
	toxic gases to form, which may include carbon dioxide and carbon monoxide.
Special protective equipment and Special firefighting procedures	Self contained breathing apparatus and full protective clothing must be worn in case of fire.

#### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures	<ul> <li>For non-emergency personnel: No action shall be taken involving any personal risk or without suitable training.</li> <li>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Put on appropriate personal protective equipment.</li> <li>For emergency responders: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".</li> </ul>
Environmental Precautions	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
Methods and materials for containment and cleaning up	<ul> <li>Small spill: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.</li> <li>Large spill: Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.</li> </ul>

### 7. Handling and storage

Precautions for safe handling	Put on appropriate personal protective equipment (See Section 8).
Conditions for safe storage, including any incompatibilities.	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

### 8. Exposure controls/personal protection

**Occupational exposure limits** 

US. OSHA Specifically Regulated Se Components N/A	ubstances (29 CFR 1910.1001-105 Type	0) Value	
US. OSHA Table Z-2 (29 CFR 1910.1000) None of the components in this product is listed.			
US. OSHA Table Z-3 (29 CFR 1910.1 None of the components in	-

Protective Equipment			
Appropriate engineering controls	Good general ventilation shou exposure to airborne contami	uld be sufficient to control worker inants.	
Individual protection measures su	ich as porsonal protoctive equipm	aant	
Individual protection measures, su Eye/face protection	Safety eyewear complying wit be used when a risk assessme avoid exposure to liquid splas contact is possible, the follow	th an approved standard should ent indicates this is necessary to hes, mists, gases or dusts. If ing protection should be worn, ees a higher degree of protection:	
Skin protection			
Hand protection	Chemical-resistant, imperviou approved standard should be chemical products if a risk ass necessary. > 8 hours (breakth	worn at all times when handling essment indicates this is	
Body protection		nt for the body should be selected ormed and the risks involved and ialist before handling this	
Other	Appropriate footwear and any measures should be selected performed and the risks invol- specialist before handling this	based on the task being ved and should be approved by a	

Respiratory protection	Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.
Thermal hazards	Wear appropriate thermal protective clothing, when necessary.
General hygiene considerations	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

### 9. Physical and chemical properties

Appearance	
Physical state	Liquid.
Form	Liquid.
Color	Refer to label
Odor	Characteristic
Odor threshold	No information available.
рН	7.8
Melting point	No information available.
Freezing point	No information available.
Initial boiling point and boiling range	212 °F
Flash point	N/A
% Volatile by Volume	No information available.
Evaporation rate (BuOAc=1)	Slower than ether.
Material Volatile Organic Compound	No information available.
(V.O.C.)	
Coating Volatile Organic Compound	30 g/L (maximum)
(V.O.C)	
Flammability (solid, liquid, gas)	None.
Upper/lower flammability or explosive l	imits
Flammability limit – lower (%)	Not applicable.
Flammability limit – upper (%)	Not applicable.
Explosive limit - lower (%)	No information available.
Explosive limit - upper (%)	No information available.
Vapor pressure at 20°C	18.82 mbar
Vapor density (Air=1)	Heavier than air.
Relative density (Specific gravity)	1.04
Solubility(ies)	
Solubility (water)	Completely miscible
Solubility (other)	No information available.
Auto-ignition temperature	N/A

Decomposition temperature	No information available.
Viscosity	No information available.

### 10. Stability and reactivity

Reactivity	Product is stable.
Chemical stability	Stable under recommended handling and storage conditions.
Possibility of hazardous reactions	Hazardous polymerization will not occur.
Conditions to avoid	Elevated temperatures. Contact with oxidizing agent.
Incompatible materials	Oxidizers, acids and bases.
Hazardous decomposition Products	Burning or decomposing film may give off carbon dioxide and
	or carbon monoxide.

### 11. Toxicological information

IngestionNo specific data.InhalationNo specific data.Skin contactNo specific data.Eye contactNo specific data.Symptoms related to the physical, chemical and toxicological characteristicsNo specific data.Delayed and immediate effects and also chronic effects from short- and long-term exposureNo known significant effects or critical hazards.Skin corrosion/irritationRepeated or prolonged contact may result in non-alleric contact dermatitis and/or absorption through the skin. Splashing may cause eye irritation and reversible damage.Serious eye damage/eye irritation Respiratory or skin sensitization Skin sensitizationNo information available.Germ cell mutagenicityNo known significant effects or critical hazards.CarcinogenicityNo known significant effects or critical hazards.Reproductive toxicity - single exposureNo information available.Specific target organ toxicity - repeated exposureNo information available.Specific target organ toxicity - single exposureNo information available.Specific target organ toxicity - repeated exposureNo information available. <th colspan="3">Information on the likely routes of exposure</th>	Information on the likely routes of exposure

#### 12. Ecological information

Toxicity	No information available.	
Persistence and degradability	No information available.	
Bioaccumulative potential	No information available.	
Mobility in soil No information av		
Other adverse effects	No information available.	

#### **13.** Disposal considerations

Waste from this product is not hazardous as defined under the Resource Conservation and Recovery Act (RCRA) 40 CFR 261. Dispose of in accordance with Federal, State and Local regulations. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

#### **14.** Transport information

In accordance with DOT	Not regulated for transport.
In accordance with IMDG	Not regulated for transport.
In accordance with IATA	Not regulated for transport.
15. Regulatory information	

**US federal regulations** 

This product is not a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

All components are on the U.S. EPA TSCA Inventory List.

#### Disclaimer

The information, recommendations, and suggestions presented in this SDS are based upon test results and data believed to be reliable. The end user of the product has the responsibility for evaluating the adequacy of the data under the conditions of use, determining the safety, toxicity and suitability of the product under these conditions, and obtaining additional or clarifying information where uncertainty exists. No guarantee expressed or implied is made as to the effects of such use, the results to be obtained, or the safety and toxicity of the product in any specific application. Furthermore, the information herein is not represented as absolutely complete, since it is not practicable to provide all the scientific and study information in the format of this document, plus additional information may be necessary under exceptional conditions of use, or because of applicable laws or government regulations. All materials may present unknown hazards and should be used with caution.
